DETAILED ACTION***Election/Restrictions***

1. Claims 9-12, 16-18, 29-34 and 36 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.
2. Applicant's election of claims 1-8, 13-15, 19-28 and 35 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The term "display engine" in claim 35 is not provided in the specification.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2873

5. Claim 35 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not define what makes up a “display engine” as claimed.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, the limitations of the steps of the claim require multiple “if” conditions and as such, the limitations are not considered positive limitations which render the claim and its dependents indefinite.

In claim 24, line 4, the phrase “a partial turning mirror to replace an existing turning mirror in said projection system’ optical path” renders the claim indefinite because it is unclear if “an existing turning mirror” is part of the scope of the claim. The examiner recommends deletion of the phrase “to replace an existing turning mirror in said projection system’ optical path”. It does not appear that this limitation adds to the claim, except that it adds to the indefiniteness of what is claimed.

8. Claims 19 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: a micro-controller and brightness

Art Unit: 2873

control element is missing from claims 19 and 24. Applicant claims a detector, which controls brightness, but the specification does not disclose that the detector alone can control brightness. The detector works in concert with a micro-controller and brightness control element to control brightness.

Allowable Subject Matter

9. Claims 1-8 are allowed.

10. Claims 20-23 and 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is an examiner's statement of reasons for allowability: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-8, 20-23 and 25-28, wherein the claimed invention comprises a lamp providing a white light along a first light path, servo positioning said lamp, a partial mirror on said first path, said partial mirror separating said white light into a primary beam and a secondary beam, relay lenses, red-blue-green color splitting prisms and a micro-controller coupled to servo motors, as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art and all of said features are relied upon for a determination of allowability.

Art Unit: 2873

Conclusion

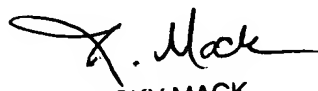

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited for disclosing an optical device for controlling luminous intensity and/or servo controlled positioning: Mizutani et al. (5488230), Nakayama et al. (5626409) and Nakayama et al. (6309073).
